

**Model No. SG-PAC-10E2 (KY-101)**

**10,000 BTU Portable Air Conditioner  
Operating Instructions**

V.121010

Thank you for choosing a Soleus Air Powered by Gree Portable Air Conditioner. This owner's manual will provide you with valuable information necessary for the proper care and maintenance of your new product. Please take a few moments to thoroughly read the instructions and familiarize yourself with all the operational aspects of your new Portable Air Conditioner.

For your own records, please attach a copy of your sales receipt to this manual. Also, write the store name/location, date purchased, and serial number below:

Store Name: \_\_\_\_\_

Location: \_\_\_\_\_

Date Purchased: \_\_\_\_\_

Serial Number (located on back of unit): \_\_\_\_\_

## **IMPORTANT INSTRUCTIONS**

**Before installing and using your portable air conditioner, please read this owner's manual carefully. Store this manual in a safe place for future reference.**

- 1) Always place the unit on a level surface.
- 2) Never use or store gasoline or other flammable vapor or liquid near this unit unless instructed by this manual.
- 3) Maintain at least 10 inches (25 cm) clearance space around this unit. Do not block or cover air inlet or outlet grilles.
- 4) The unit must be connected to a correctly grounded power supply.
- 5) Do not start or stop the unit by inserting or pulling out the power plug.
- 6) Do not use an adapter plug or extension cord.
- 7) Do not use the unit in the immediate surroundings of a bath, a shower or a swimming pool.
- 8) Do not insert anything into the air outlet. Do not obstruct air inlet or outlet grills unless instructed by this manual.
- 9) Do not let children play near this unit.
- 10) Always inspect the cord for signs of damage before use. If the power cord is damaged, it must be replaced by the manufacturer or a qualified service technician.
- 11) When cleaning the unit, always turn the unit off and unplug the power cord.
- 12) Avoid using heating appliance near the air conditioner.

## LCDI POWER CORD AND PLUG

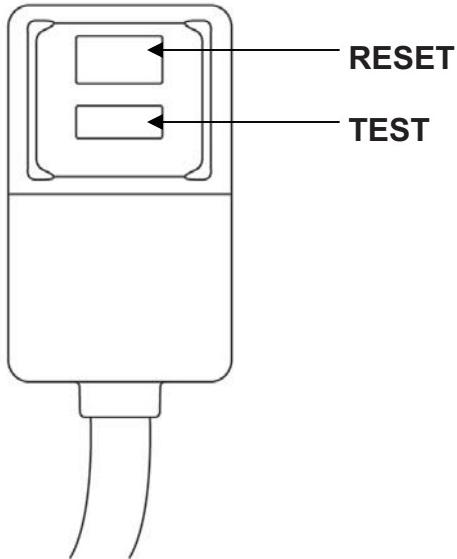

This air conditioner is equipped with an LCDI (Leakage Current Detection and Interruption) power cord and plug as required by US National Electric Code 440.65. This cord consists of a length of shielded flexible cord with no termination on the load side and a LCDI attachment plug on the line side.

The LCDI power cord and plug will remove the supply source via electrical disconnect (circuit trip) if the nominal current leakage between the cord shield and either load conductor exceeds a predetermined value. The cord will remain de-energized until the device has been manually reset. This is intended to reduce the risk of a fire in the power cord or combustible materials nearby. The cord shields are not grounded and they must be considered a shock hazards if exposed. The cord shield must not be connected to ground or to any exposed metal.

The test and reset buttons on the LCDI Plug are used to check if the plug is functioning properly. To test:

1. Plug power cord into wall outlet
2. Press TEST Button, circuit should trip, cutting power to the air conditioner
3. Press RESET button for use

If a test is performed and the indicator light remains ON, current leakage has been detected. Do not use the air conditioner or attempt to reset the LCDI Plug. Contact Soleus Air Powered by Gree Customer Service for troubleshooting recommendations.

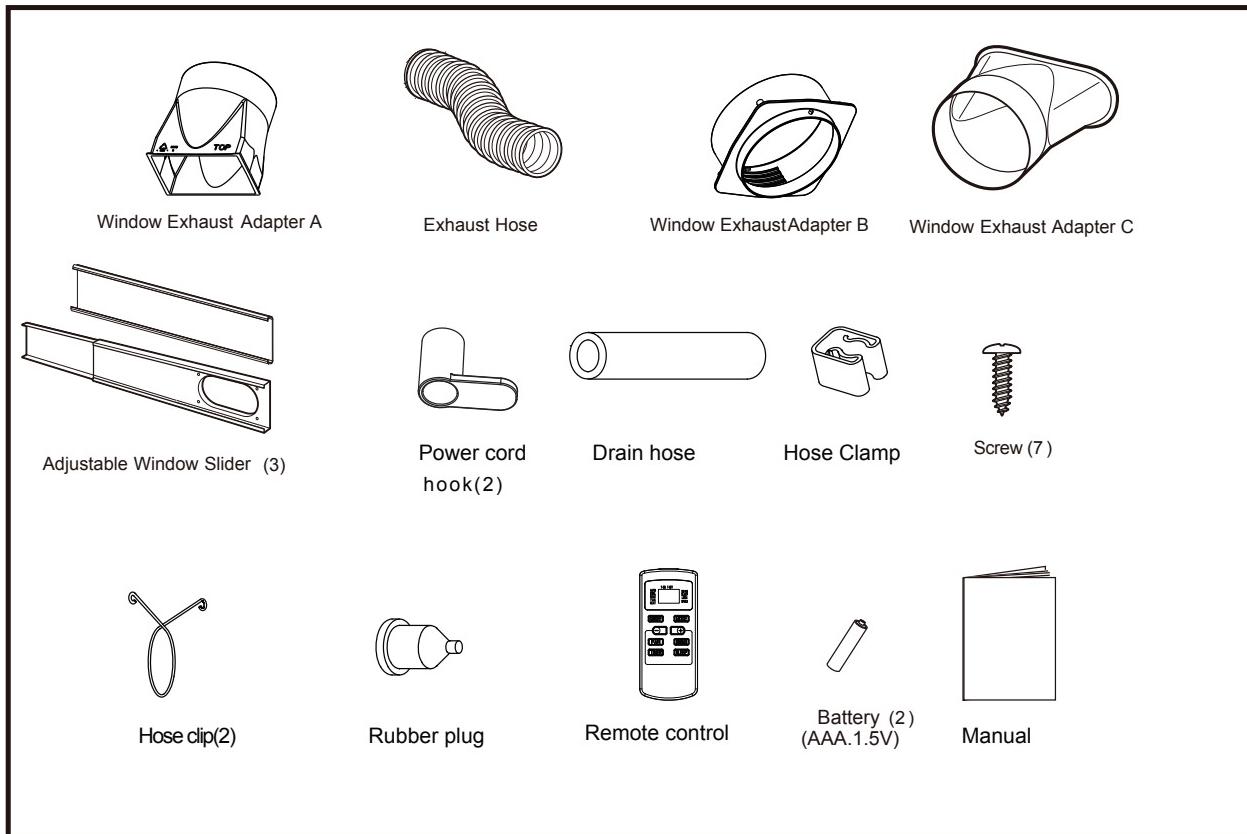

### WARNING:

1. DO NOT press the TEST button while the air conditioner is operating.
2. The TEST and RESET buttons should not be used as "ON" and "OFF" switches.
3. The cord and plug are not intended to offer protection to externally connected loads or supply circuits.
4. The cord and plug are intended for indoor use only.

NOTE: Your units power cord and plug may differ from the one shown.

# INCLUDE

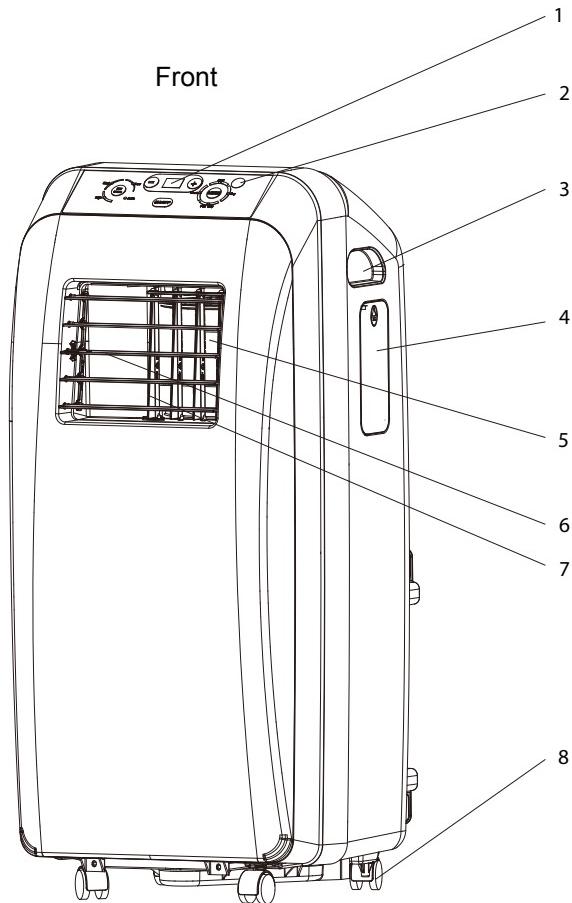

## PARTS INCLUDED

## SUGGESTED TOOLS FOR WINDOW PANEL INSTALLATION

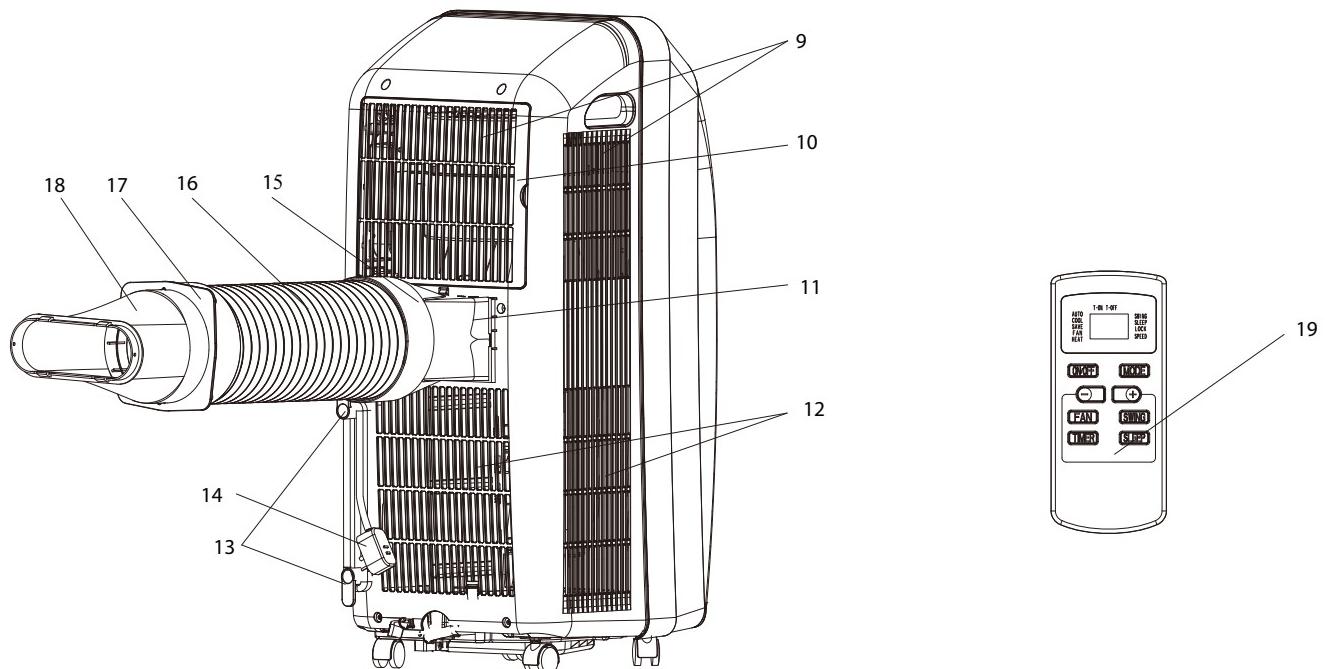

1. Screwdriver(medium size Phillips)
2. Tape measure or ruler
3. Knife or scissors
4. Saw (In the event that the window panel needs to be cut down in size because the window is too narrow for direct installation.)

# STRUCTURE

- 1, Control panel and display light
- 2, Remote control signal receiver window
- 3, Handle
- 4, Remote controller box
- 5, Air outlet
- 6, Vertical louvers
- 7, Horizontal louvers
- 8, Wheel
- 9, Air inlet
- 10, Grille
- 11, Air outlet
- 12, Air inlet
- 13, Power cord hook
- 14, Power cord
- 15, Window exhaust adapter A
- 16, Exhaust hose
- 17, Window exhaust adapter B
- 18, Window exhaust adapter C
- 19, Remote control

Rear

## PACKAGE CONTENTS

Portable Air Conditioner  
Exhaust Hose (1)  
Window Exhaust Adapter A (1)  
Window Exhaust Adapter B (1)  
Window Exhaust Adapter C (1)  
Remote Control & AAA Batteries (2 batteries)  
Window Kit - 3 Sliding Panels (1 single hose panel, 2 extension panels)  
Drain Hose Assembly (drain pipe, hose clamp, hose clip, rubber plug, & screw)  
Power cord hooks (2hooks & screws)  
Owner's Manual

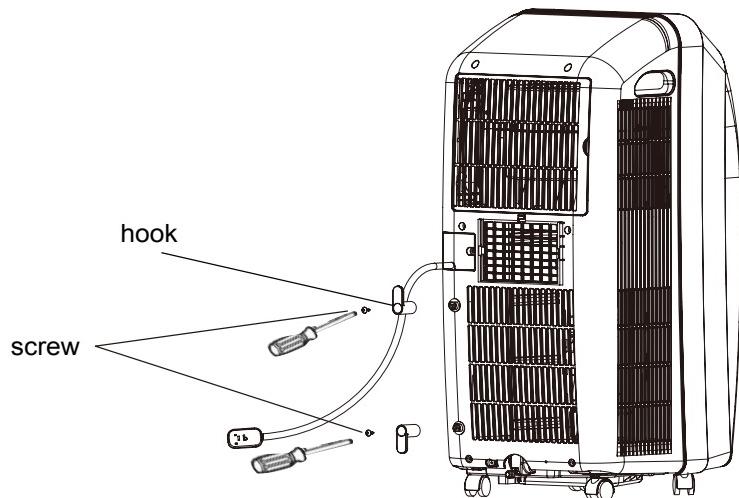

## SPECIFICATIONS

- The cooling capacity is measured at an ambient temperature of DB 95 °F, WB 83 °F.
- Noise level is measured at a distance of 3.28 ft away from the front of the unit, when the unit is in cooling mode.
- Power consumption is measured when the fan runs at the highest speed setting.
- These specifications are for reference only. For actual data, please refer to the rating label on the back of the unit.
- If the environment temperature is higher than the max operating temperature or lower than the minimum operating temperature, the air conditioner may not work properly.

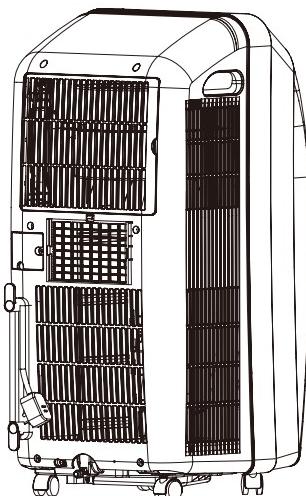

Model Number	SG-PAC-10E2
Reference Number	KY-101
Power Supply (Ph/V/Hz)	1/115/60Hz
Dehumidifying Capacity (Pints/Day)	60
Rated Cooling Capacity (BTU/h)	10,000
Rated Heating Capacity (BTU/h)	/
Cooling Power Input (Watts)	1120
Heating Power Input (Watts)	/
Rated Current Cooling (Amperage)	9.9
Rated Current Heating (Amperage)	/
EER/C.O.P	/
Noise Level dB(A)	<=53
Air Flow	176 CFM
Design Pressure (PSIG) (H/L)	/
Dimensions (W" x D" x H")	13.375X15.5X30.75
Package Dimensions (W" x D" x H")	21.75X15.75X32
Net/Gross Weight (Lbs)	53/66
Refrigerant Type	R-410A
Refrigerant Charge (Oz)	16.9

## INSTALLATION OF THE POWER CORD HOOK

- Attach the hooks to the back of air conditioner with the screws.

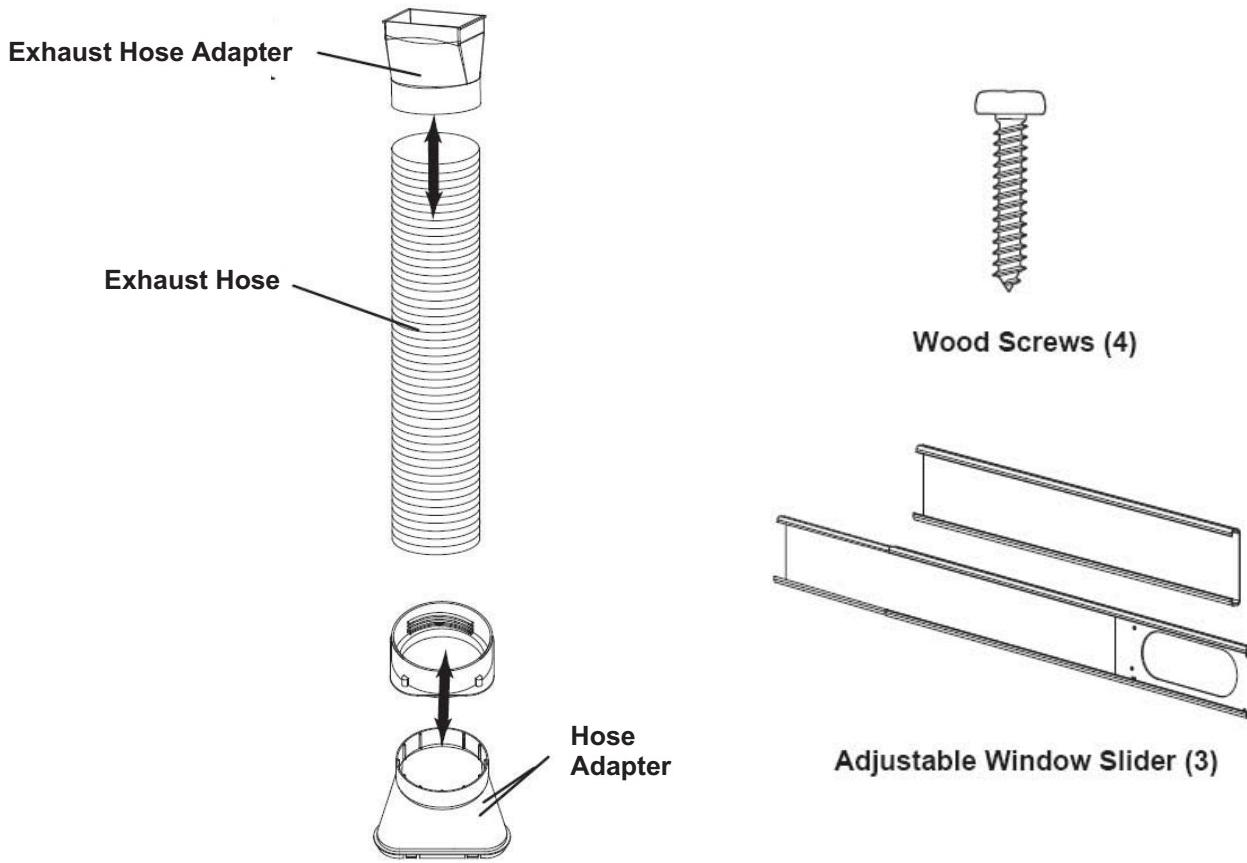

- Wind the power cord around the power cord hooks.

# PARTS & WINDOW KIT ASSEMBLY

## PARTS

### EXHAUST HOSE & ADAPTERS

## ASSEMBLY & INSTALLATION

### INSTALLATION

When the unit is operating as an air conditioner or dehumidifier, the window kit and exhaust hose must be installed. When the unit is operating in fan mode, the window kit and exhaust hose do not need to be installed.

### MOUNTING THE EXHAUST HOSE

- Choose a suitable location, near a grounded electrical outlet and suitable window or door. Remove packaging and locate components.
- Extend both ends of the exhaust hose approximately 6 inches.
- Screw the window kit adapter onto one end of the exhaust hose clockwise. Screw the hose adapter onto the other end of the exhaust hose clockwise.
- Mount the exhaust hose onto the back of the unit by locking the hose adapters into place.
- For maximum efficiency do not bend the hose as much as possible.

## SINGLE HOSE WINDOW KIT INSTALLATION

### Installation of the Venting Kit FOR SINGLE HOSE PORTABLE AIR CONDITIONERS

Innovative products for a cleaner,  
more comfortable world.

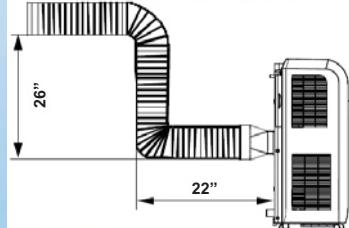

*The venting kit must be installed in order for the unit to work correctly in the air conditioning mode. The venting kit should not be used while the unit is heating or fanning.*

*The window kit has been designed to fit into most vertical and horizontal window openings. The window kit can also be used in a sliding door.*

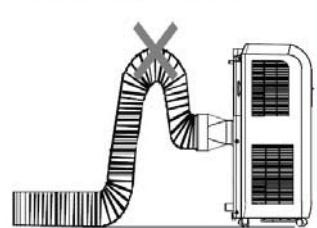

1. Choose a suitable location, near a grounded electrical outlet and a suitable window or door. Remove packaging and locate components. (figure a)
2. Slide the exhaust connector over the discharge opening on the back of the unit. (figure b)
3. Connect the exhaust hose to the exhaust connector, aligning the fitted groove. (figure c)
4. Open the window or door and adjust the length of the window kit to fit the opening. (figure d) If necessary, mark the kit and cut one end down to properly fit the opening. (figures e & f)
5. Attach the window kit adapter to the window kit. (figure g)
6. Place the window kit back into the window and attach the exhaust hose to the window kit adapter. (figures h & i) Close the window tightly. (figure j) Your Portable Air Conditioner is now ready to cool!

*NOTE: When using the venting system, keep the exhaust hose as straight as possible. The exhaust hose can be shortened, but it is not recommended to increase the length of the exhaust hose. Do not use an extension cord with your portable air conditioner.*

This installation is OK

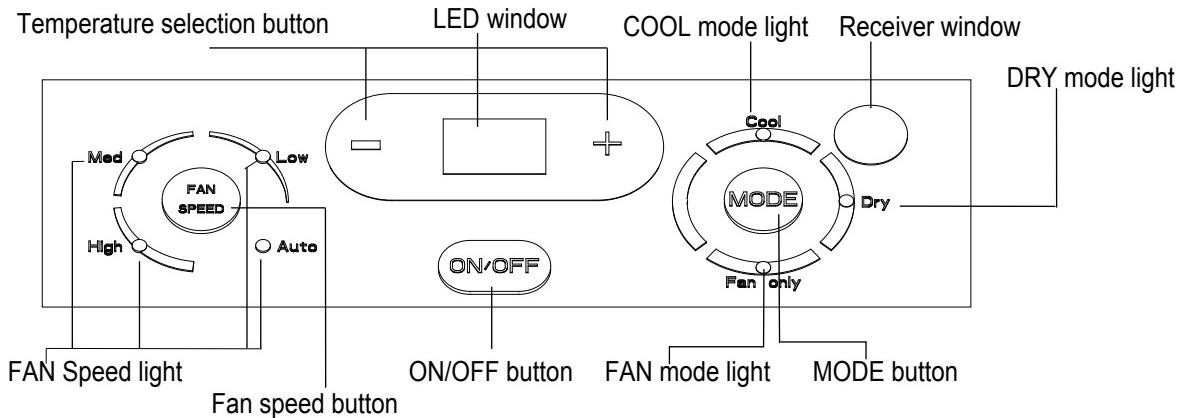

The is a poor installation

When installing the exhaust hose, try and keep it as flat as possible. The less angles and bends in the hose, the better the unit will perform. If bending or an angle is necessary, use single 90° angles like the pictures above. Multiple bends will decrease performance and efficiency.

# CONTROL PANEL DISPLAY & OPERATING INSTRUCTIONS

## CONTROL PANEL & DISPLAY

### ● OPERATING INSTRUCTIONS

When pressing key is valid, buzzer makes a sound, indicated light indicates relevant state, system will last for 2 seconds.

#### 1. ON/OFF Button

Press the button once to manually turn the unit on. Press once more to turn the unit off.

#### 2. "+" , "-" Button

In COOL mode, press "-" once, the set temperature will decrease 1°C(°F) , press "+" once, the set temperature will increase 1°C (°F). The set temperature range from 16°C to 30°C(61°F to 86°F).

#### 3. MODE Button

Press MODE Button repeatedly to cycle between the modes: Cooling, Dry, and Fan only mode. Each press of the MODE button will light up a different lights on the control panel. The exhaust hose and window kit must be installed when the unit is in Cool or Dry mode. When using the unit as a fan, it is unnecessary to keep the exhaust hose and window kit connected to the unit.

#### 4. Fan Speed Button

When the unit is running in Cool or Fan mode, press the Fan speed Button to select the fan speed in High, Middle, Low , Auto. In cool mode, it can decrease the temperature of the room, and make people very comfortable.

#### 5. Water Full

When COOL or DRY is running, condensate will drain to water tank. When water tank is filled, buzzer will sound 8 times, LED screen show error code 'H8'.

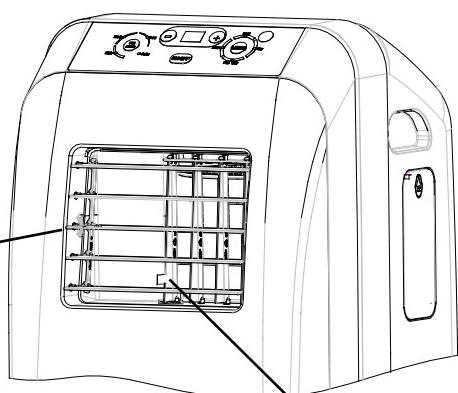

In this case, reference page 8 to drain out water intank.

#### 6. Louver Direction

This unit has 4-Way directional louvers.

Use the louver guides to direct air where cooling or fanning is needed most. Hold the louver and adjust the air flow direction, as shown in the right diagram.

Hold this hand grip to adjust the direction of Horizontal Louvers

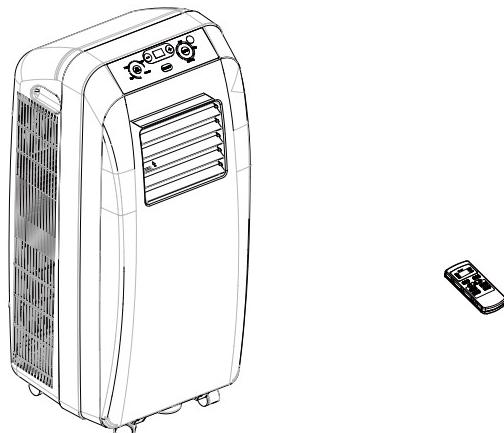

Hold this hand grip to adjust the direction of Vertical Louvers

## HOW TO USE THE REMOTE CONTROL

Point the remote control towards the units signal receiver window and press the desired button. A beep will sound when the unit receives the signal.

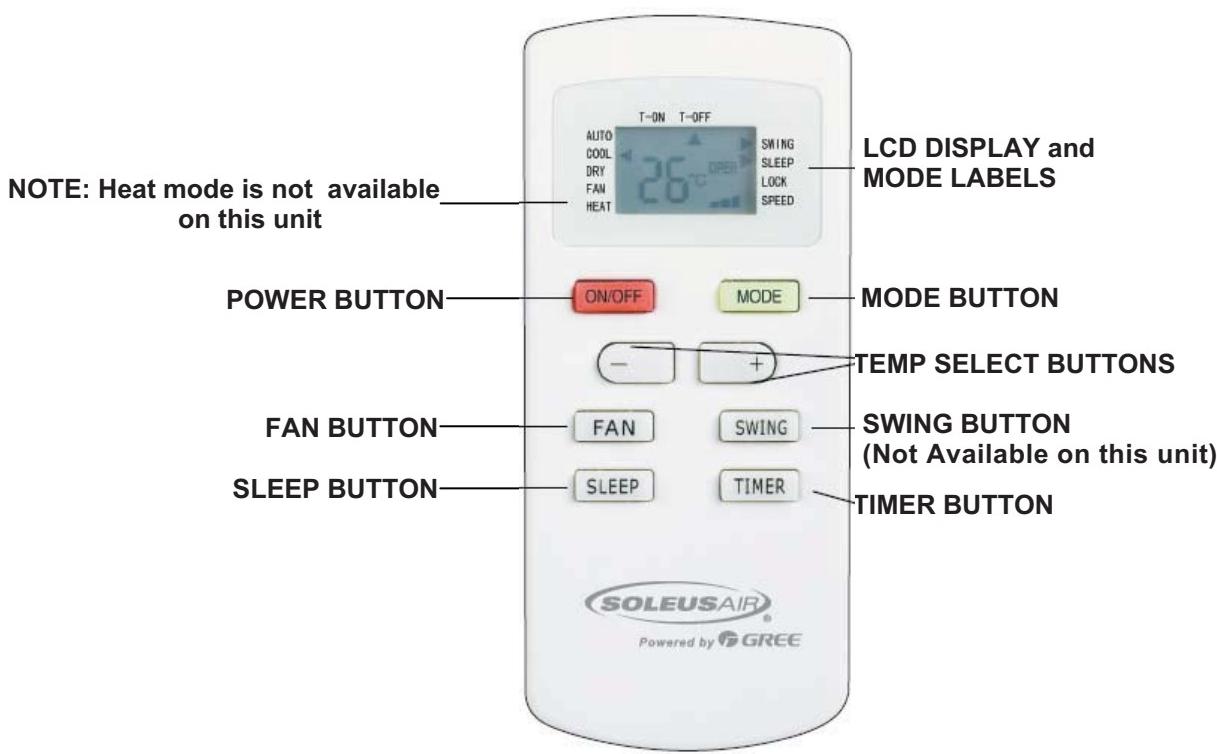

- Make sure nothing, such as curtains, blocks the signal receiver window.
- For good receive, the distance between operator and the unit no more than 5 meters.

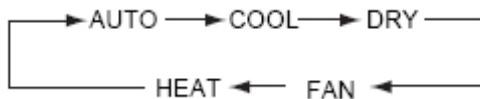

### CAUTION

- Do not expose the signal receiver window to direct sunlight. This may adversely affect its operation. **If necessary to close the curtains to block out the sunlight.**
- Use of a fluorescent lamp in the same room may interfere with transmission of the signal.
- The unit may be affected by signals emitted from other remote controllers for televisions, VCRs or other equipment used in the same room.
- Do not leave the remote control exposed to direct sunlight or near a heater. Protect the remote control from moisture and shock which can discolor or damage it.

# REMOTE CONTROL OPERATING INSTRUCTIONS

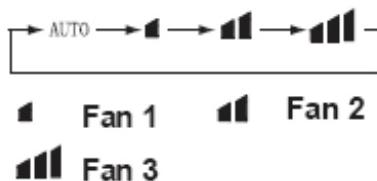

- Power On and Off** - Press the **ON/OFF (POWER)** button once to manually turn the unit on. Press the Power button once more to turn the unit off. When you manually power the unit on and off by pressing the **ON/OFF** button, the preset timer will be cancelled.
- Mode Selection** - Press the **MODE** Button repeatedly to cycle between the different modes: Auto, Air Conditioner, Dehumidifier, and Fan only mode. Once a mode is selected, an arrow will light up on the LCD display next to the selected **MODE** label on the remote. Auto mode automatically chooses the air conditioner, dehumidifier, or fan mode based on the current room temperature.

**NOTE: HEAT MODE NOT AVAILABLE**

- Fan Speed** - Press the **FAN** speed button to cycle through low, medium, and high fan speeds. The small fan icons will light up depending on which speed is selected. The more fan icons light up, the higher the speed. The fan icons are located on the LCD display next to the **SPEED** label.

- Temperature Setting** - When the unit is in Air Conditioner mode you can select your desired temperature. Press the **TEMP SELECT** buttons (+ or -) to select your desired temperature setting. The temperature on the LCD display on the remote control will increase or decrease accordingly. Hold the +/- buttons for two seconds to rapidly increase or decrease the temperature.

## REMOTE CONTROL OPERATING INSTRUCTIONS (Cont.)

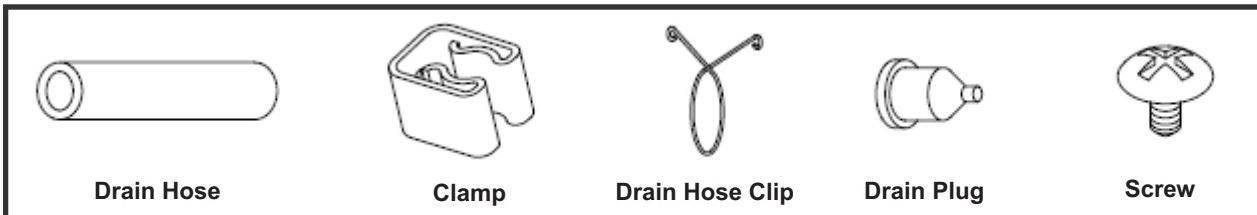

- 5) **Auto-on Timer:** When the air conditioner is off, it can be set to automatically turn on in 30 minutes to 24 hours at the previous set mode and fan setting. To set the Auto-on Timer, press the **TIMER** button on the unit or remote control. Each touch of the +/- buttons on the remote will change the timer setting in 30 minute increments (.5 hours). The **T-ON** and **H** lights will blink while the Auto-on Timer is being set. Once the timer is set, press the **TIMER** button once more to save the setting. Press the **ON/OFF** button to cancel the timer.

**Auto-off Timer:** When the air conditioner is on, it can be set to automatically turn off in 30 minutes to 24 hours. To set the Auto-off Timer, press the **TIMER** button on the remote control. Each touch of the +/- buttons on the remote will change the timer setting in 30 minute (.5 hour) intervals. The **T-OFF** and **H** lights will blink while setting. To cancel the timer, press the **ON/OFF** button. Once the timer is set, press the **TIMER** button once more to save the setting. Press the **ON/OFF** button to cancel the timer.

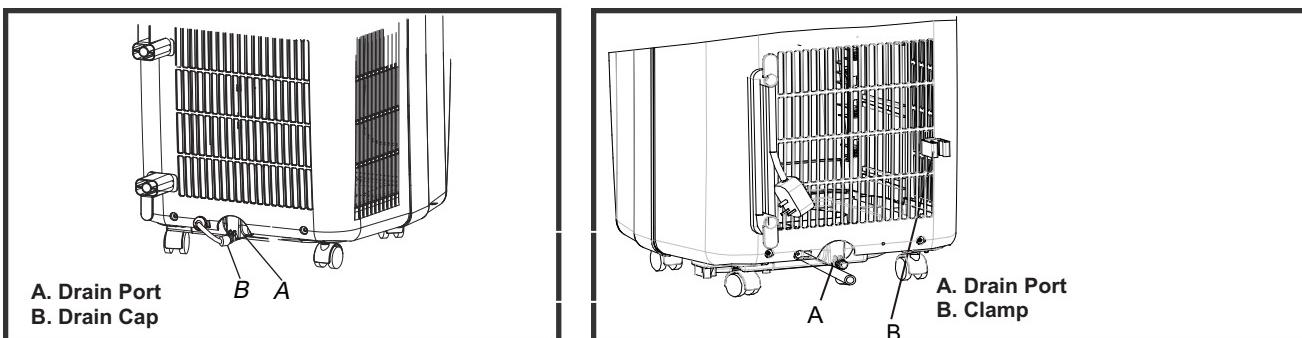

- 6) **Sleep Mode** - Press the **SLEEP** mode button to engage **SLEEP** mode. Sleep mode automatically raises the set temperature by 2°F after one hour and 4°F after two hours. This feature limits compressor usage and enhances energy savings while you are sleeping.
- 7) **Auto Mode** - When **AUTO** mode is selected the air conditioner will automatically choose the operating mode base on the current room temperature. When the room is below 68°F the air conditioner will automatically fan the room to circulate air. When the room temperature is between 68°F-73°F the air conditioner will operate in Fan mode if it was previously selected or dehumidifier mode (if another mode was used previously) to remove humidity from the air as well as some cooling to help lower the room temperature. When the room temperature is between 74°F-79°F the air conditioner will always operate in dehumidifier mode. When the room temperature rises above 79°F, the unit will operate in air conditioner mode to maximize cooling. Auto mode uses pre-determined settings to keep you comfortable by choosing the most energy efficient mode based on the temperature of the room.

## DRAINING COLLECTED WATER

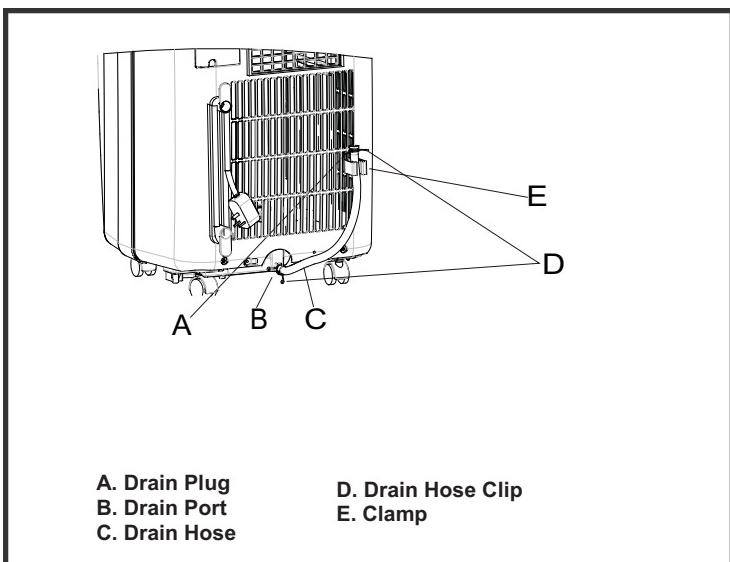

When the temperature or humidity is too high, the air conditioner may not be able to evaporate all of the water as quickly as needed. All moisture that is unable to be evaporated is placed in a small bank up water tank inside the unit. When this tank is completely full, an alarm will sound, the compressor will shut off, and the bucket full icon will light up on the control panel. To manually empty the tank, please follow the instructions below.

- 1) Remove the pre-installed Drain Cap from the unit (See Below).
- 2) Attach the Clamp with the provided Screw (See Below).

- 3) Attach the Drain Hose to the Drain Port using the Drain Hose Clip. Insert the Drain Plug into the free end of the Drain Hose and guide the Drain Hose through the Clamp. Once finished, the unit can be easily drained by removing the drain plug and guiding the drain hose into a small pan to drain the water.

## MAINTENANCE

---

Note: Make sure power is off and the power cord is not plugged into an electrical outlet prior to performing any maintenance on the unit.

Clean or replace filter - If the air filter is blocked with a dust, the airflow volume may reduce. It is recommended to clean the filter once every two weeks or as needed.

- 1) Remove the filter from the filter compartment on the back of the unit.
- 2) Wash the air filter by immersing it gently into warm water with a neutral detergent. Rinse the filter and dry it thoroughly out of sunlight.
- 3) Slide the filter back into the filter compartment after it is thoroughly dried.
- 4) If the filter is torn or unusable, order a new filter by calling the customer service number on the warranty page of this manual.

Clean the unit Housing

- 1) Keep the unit from being exposed directly to the sun to prevent color fading.
- 2) Clean the surface with a damp cloth and dry it with a soft towel.

Storing the Unit for an Extended Period of Time or Transporting the unit

- 1) Empty any excess water by unplugging the water drainage stop in the back of the unit (located at the bottom).
- 2) Unplug the unit.
- 3) The unit should be stored in a cool dry place.

## DISCLAIMER

# **WARRANTY**

## **One Year Limited Warranty**

Soleus International Inc. warrants the accompanying Soleus Air Powered by Gree Portable Air Conditioner to be free of defects in material and workmanship for the applications specified in its operation instruction for a period of ONE (1) year from the date of original retail purchase in the United States.

If the unit exhibits a defect in normal use, Soleus International Inc. will, at its option, either repair or replace it, free of charge within a reasonable time after the unit is returned during the warranty period.

As a condition to any warranty service obligation, the consumer must present this Warranty Certificate along with a copy of the original purchase invoice.

### **THIS WARRANTY DOES NOT COVER:**

- Damage, accidental or otherwise, to the unit while in the possession of a consumer not caused by a defect in material or workmanship.
- Damage caused by consumer misuse, tampering, or failure to follow the care and special handling provisions in the instructions.
- Damage to the finish of the case, or other appearance parts caused by wear.
- Damage caused by repairs or alterations of the unit by anyone other than those authorized by Soleus International Inc.
- Freight and Insurance cost for the warranty service.

ALL WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY ARE LIMITED TO ONE-YEAR DURATION OF THIS EXPRESS LIMITED WARRANTY. **SOLEUS INTERNATIONAL INC.** DISCLAIMS ANY LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES AND IN NO EVENT SHALL SOLEUS INTERNATIONAL INC'S LIABILITY EXCEED THE RETAIL VALUE OF THE UNIT FOR BREACH OF ANY WRITTEN OR IMPLIED WARRANTY WITH RESPECT TO THIS UNIT.

This warranty covers only new products purchased from our authorized dealers or retailers. It does not cover used, salvaged, or refurbished products.

As some states do not allow the limitation or exclusion of incidental or consequential damages, or do not allow limitation on implied warranties, the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.
